SUMMARY

Motivated and passionate, currently enrolled at the Informatics Institute of Technology (IIT), affiliated with the University of Westminster, in pursuit of a BSc (Hons) in Computer Science. A strong desire for enhancing problem-solving abilities and exploring innovative technical solutions has been developed. Dedication to both professional and personal growth is maintained, with continuous refinement of technical expertise, critical thinking, and adaptability to excel in demanding environments. Through acquired training and experience, significant contributions to the technology industry are aimed for by generating creative ideas and implementing effective solutions.

EDUCATION

Bachelor of Science in Computer Science degree affiliated with University of Westminster.	Sep 2023 - Present
Foundation Certificate in Higher Foundation at Informatic Institute of Technology	May 2022- Sep 2022
GCE Advance Level (Biology,Chemistry,Physics)	2021 (2022)
GCE Ordinary Level (A-5 , B-4)	2018

PROJECTS

- SugarSync Mobile Application (Second year Group Project)

(Sep 2024 - Present)

Participated in developing SugarSync, an application designed to create personalized meal plans for diabetes management. The app emphasized balanced nutrition and portion control, integrating features like meal tracking and health monitoring.

Technical Stack: Flutter/Firebase/SQL
- Ticket Management System

(Nov 2024 - Jan 2025)

The Ticket Management System is a web-based application that helps organizations track and manage support tickets efficiently. It allows users to create, assign, and resolve tickets while providing real-time status updates. Built with a React frontend and a Java Spring Boot backend, the system ensures seamless issue tracking and resolution.

Technical Stack: React | Java (SpringBoot) | MySQL
- Plane Management System

(Feb 2024 - May 2024)

Developed a Java program to manage flight seat bookings, including functionalities to book and cancel seats. The system ensures efficient seat allocation and updates real-time availability for passengers.

Technical Stack: Java | Java FX

- **Life of Land – Tourism web site(Group Project).**

(Jan 2024 - Mar 2024)

Worked collaboratively to design and build a tourism-focused website using HTML, CSS, and JavaScript. The website featured interactive elements, destination highlights, and user-friendly navigation to enhance visitor engagement.

Technical Stack : Html | CSS | JavaScript

ADDITIONAL INFORMATION

- **Technical Skills:-**

Programming Languages : Python | Java

Other Technologies : HTML | CSS | JavaScript | React | SpringBoot

Software & Tools: Figma | Git | VsCode | Axure | ClickUp

- **Soft Skills:-**

Communication

Teamwork

Time Management

Creativity

- **Hobbies:-**

Swimming

Basketball

- **Languages:-**

Sinhala

English
